The SENTA PUR L combi bathing lift fulfils the highest demands on quality and reliability. It is versatilely applicable and can be operated easily and safely by one single nurse only ...

Combi showering and bathing lift SENTA PUR L

The SENTA PUR L showering and bathing lift is just the right device to shower or bath the patient anytime safely and comfortably. The combi bathing lift fits in with any existing nursing and care tub. It can be effortlessly converted into a complete stretcher lift by means of the optional stretcher lift modules to be attached to the both sides of the seat. The stretcher lift modules are positively adjustable in 3 steps and can be separately removed. The chassis is designed in such a way that a self-entry of the resident without any obstacles for his legs or heels is possible. Standard safety belts, surrounding handles as well as optionally available side rail offer the resident a necessary safety. The low chassis enables the lift to pass underneath nursing beds and provides for an easy transfer from the bed.
